Product Label Change Notification for LSP Module Series (PCN# 4192E)

Dear Valued Customers,

Littelfuse would like to notify you of a change related to the product label of LSP Module Series.

In order to clearly indicate product single pulse surge rating (Imax) and compliant with the terminology of voltage protection level (Up) from IEC61643-11 for LSP Module Series, we will start to add the “Imax” rating on existing labels for all LSP module products, and revise the “MLV” to “Up” for part numbers ending with suffix code of X3333 and X3316. There will be no changes to the electrical or dimensional specifications.

Please refer to the following label images/templates and affected part number list. The change of the new label will be implemented from **March 1st, 2015**; during this transition period, customers are expected to receive the LSP Modules with two types of labels until the products with current label in our warehouse and the distribution channels are depleted.

From the publish date of this PCN, all the existing sample orders will use new marking label.

Please respond to us by **February 13th, 2015** to acknowledge the notification of this change. If we do not hear from you then we will expect that this change has been accepted and no further action is required. Thank you!

Best Regards
Johnny Chang
